

“ All you need is a BlackBerry. ”

Lose your laptop!

Step into a meeting room with only your BlackBerry and impress the audience with the same dynamic presentations once only possible from your computer.

On top of being able to check and reply your emails, plan and organize your schedule, answer phone calls, send SMS / MMS, surf the internet, enjoy multimedia entertainment, now you can use your BlackBerry to conduct your presentations to your clients.

All you need is the Impatica ShowMate, which enables you to connect your BlackBerry to a projector and present compelling PowerPoint presentations wherever you go.

Before anything is done, your clients are already greatly impressed with your professionalism.

How It Works

Impatic ShowMate enables users to project:

- **PowerPoint presentations** from BlackBerry
- **Screen contents** from BlackBerry smartphones with BlackBerry OS 4.3 or later

Users simply connect the ShowMate to a projector and wirelessly to their BlackBerry, and are then ready to present.

To get a PowerPoint show started, users open a presentation that they have already saved to the handheld. The PowerPoint slides are displayed on the projector screen. Text, graphics, charts, graphs and even advanced animations and transition effects are shown in full fidelity. The handheld becomes an easy-to-use remote, allowing the user to navigate through the presentation while viewing a slide list, text or notes.

Product Features

Impatica ShowMate is a simple, compact device that makes presenting to your audience easy.

Easy to use:

- Features plug-and-present simplicity
- Displays all PowerPoint slide attributes including animation and transition effects
- Uses handheld as a remote control
- Shows presentation notes, slide titles and text on the handheld
- Operates without buttons or switches

Easy to carry:

- Compact
- Lightweight
