

# NetDefense® Solution

## LGA Security Management

NetDefense® is a comprehensive network security solution provided by LGA Telecom Pte Ltd. It is delivered and supported by security and network experts using best practice and best of breed products and services, customised and tailored to your needs.

As a Managed Security Service, NetDefense® identifies, protects, and mitigates against external and internal threats and vulnerabilities, such as from the internet or within the local network. It is designed to ensure smooth and uninterrupted business services and operations at all times, as well as to protect your valuable business assets.

It is the perfect solution for your business, as it provides you with the tools to put you in the know, in control and in command to manage situations before it arises, ensuring no unpleasant surprises as well as no service or operational outages at all times.

By leveraging LGA's security expertise and infrastructure, you empower your IT department to focus on core business activities without worrying about network security. It lowers risk, improves security and reduces unnecessary costs to business owners.

## ABOUT LGA

LGA Telecom Pte Ltd is an established Managed Security Services Provider, and an industry pioneer that has helped shape Singapore's Internet ecosystem back in 1995. Over 25 years, We have been delivering resilient enterprise solutions that ensure un-interrupted business operations. Today, LGA offers comprehensive managed security services and solutions that identify, alert and mitigate technological vulnerabilities, threats and potential breaches to the network and systems. Enterprises and government agencies rely and trust LGA for their security needs beyond connectivity.

Features	Value to you
High Availability	<ul style="list-style-type: none"><li>• Dual internet links (dual source) to attain near-zero downtime for Mission Critical class-level service connectivity.</li><li>• Ensures operational serviceability at all times.</li></ul>
Unified Threat Management	<ul style="list-style-type: none"><li>• Inspects all inbound and outbound network traffic, allowing only safe traffic to pass while blocking unsafe content.</li><li>• Built-in Virtual Private Network (VPN) enables employees to access their company's network outside the office while enjoying the same level of security.</li><li>• Intrusion Prevention System (IPS) vigilantly stops cyberthreats from harming your network.</li></ul>
Simplified Control Management	<ul style="list-style-type: none"><li>• By making network activities plain, simple and visible, it empowers you with complete control and manageability.</li><li>• Makes it easier for IT managers to make informed decisions in highly complex, technology-driven business environments.</li></ul>
Event and Log Management	<ul style="list-style-type: none"><li>• Capable of dealing with large volumes of device events and log messages.</li><li>• Collects and stores the data, and can be called upon to search, analyse, and report.</li><li>• Simplifies device management through a one-stop solution capable of configuring, monitoring, remediating, and auditing these devices.</li><li>• Helps you reduce operational costs and streamline your Compliance Lifecycle.</li></ul>
Security Monitoring Service	<ul style="list-style-type: none"><li>• ISO27001 certified monitoring service operated by well-trained security analysts using operational best practices.</li><li>• Provides quick identification, verification and stopping of malicious data that attempt to breach your network.</li><li>• Receives timely information on latest threats and security trends.</li><li>• Provides mitigation and recovery procedures in the event of a threat being detected.</li></ul>
Comprehensive Support	<ul style="list-style-type: none"><li>• Available 24/7 with a guaranteed incident response time.</li><li>• Hardware is warranted at all times and in the event of failure, it will be promptly replaced at no cost.</li></ul>

Optional Features	Value to you
Managed DDOS Protection	<ul style="list-style-type: none"><li>• Effective network protection against volumetric attacks that goes beyond normal security devices such as firewalls.</li><li>• Responds to DDOS threats timely to minimise business impact and data compromise.</li><li>• Comes with Data Scrubbing service to screen and remove malicious data.</li><li>• Mitigates external threats and passes only legitimate traffic to your network.</li></ul>
Web Protection	<ul style="list-style-type: none"><li>• Web-driven applications of today are tuned to run at peak and deliver optimal performance and failure to do so results in business losses or brand impairment.</li><li>• Our Web Protect service provides robust security for your server by identifying, verifying, and protecting against threats ranging from data breaches to defacement.</li></ul>
Endpoint Protection	<ul style="list-style-type: none"><li>• Get powerful protection against advanced threats without the need for IT expertise.</li><li>• Combines award-winning threat protection with web and messaging security, data protection, and rigorous mobile security and device management to secure your internal IT infrastructure.</li></ul>

With LGA NetDefense®, you do not have to spend excessively on expensive security setups and security experts. NetDefense® is a one-stop, fully managed service that not only provides you with a diverse, highly redundant, telco neutral network, it also boasts LGA's considerable network security expertise to protect your company assets 24/7/365, ensuring near zero network downtime and thus uninterrupted business continuity. LGA NetDefense® also addresses administrative concerns with automated security reporting as well as adherence to security compliance and regulatory requirements.

For peace of mind, look to LGA NetDefense® for a one-stop solution for your network security needs.
